Doors and windows
VIKKING

COMPOSITE
ENTRANCE DOORS

2020

EDITION 1

WE FULFILL DREAMS ABOUT BEAUTIFUL AND FUNCTIONAL HOMES

Vikking is a family company with 30 years of tradition. We always adhere to the principle of business reliability.
Credibility and honesty as well as a dedication to manufacturing products of the highest standard have been our vectors during our history. This is confirmed by numerous certificates, awards and a constantly growing group of satisfied customers in over a dozen countries around the world.
We have created a proprietary technology of energy-saving composite doors with superior technical parameters and aesthetic values in comparison to traditional products.

LED lighting in the door leaf, an innovative PVC door frame with Real Wood decoration, a patented system of structural bonding of glazing with countless design and decoration options, and a unique combination in the on non-rebated on both sides version doors from the Ultimate line - this is just one example of the extensive range created by our R&D department.
Satisfaction from a well-performed mission and continuous participation in the process of setting new trends is a priceless value for us.

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

CUSTOMIZED COMPOSITE DOORS AND REAL WOOD WINDOWS

The VIKKING brand is synonymous with customized joinery. Despite the global trend of product standardization, we are proud to be one of the few brands which offer tailor-made products. We design every composite door and Real Wood window taking into account the most sophisticated expectations so that you can enjoy a reliable product for decades.

We have combined advanced technology and innovative solutions with attention to every detail, so that each window and door stands out with precision, quality and optimal functionality, without any compromises in terms of durability and comfort of use characteristic of exclusive products.

PERFECTLY MATCHED

Share your dreams with us, choose from our extensive range of the highest quality door handles and other accessories – we will compose them with the utmost care. Your safety and comfort of use will be increased thanks to our advanced remote-control systems and SMART HOME integration installations.

INNOVATION AND DESIGN

The ULTIMATE door line – the leaf and frame connection is flush on both sides and the whole product is made of composite materials. This innovative solution allows to meet even the most non-standard needs. The wide range of solutions, sizes and fittings as well as the attractive appearance of hidden hinges ensure unique aesthetic values without any compromises in terms of quality and long-term maintenance-free durability. ULTIMATE doors are valued for their modern and elegant minimalism.

OPEN UP TO NEW POSSIBILITIES

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

DURABLE

SAFE

FUNCTIONAL

25 YEARS OF WARRANTY

Because we offer you composite doors of the highest quality and durability, regardless of the statutory requirements for the protection of consumer rights – we provide an extended warranty for trouble-free operation.
This is an undeniable advantage of a composite door system that wood or metal cannot ensure.

Clear rules

The manufacturer's technical efficiency warranty is subject to:

I -proper selection of doors and accessories adequate to the operating conditions,
II - operation of the composite doors in accordance with their intended purpose,
III - correct, warm fitting of doors by authorized fitters according to the manufacturer's instructions,
IV - performing periodic inspections, adjustments and maintenance according to the manufacturer's guidelines,
V - immediate reporting of defects to prevent further damage to the door,
VI - use of the doors in an individual housing segment, for other applications a standard 3-year warranty applies.

The full content of the warranty provisions and instructions regarding quality acceptance, correct assembly, operation and maintenance are attached to each product in the language of the country of destination.

We provide warranty and post-warranty service.

Composite door leaf and frame

Brand - a guarantee of reliable products

VIKKING composite doors guarantee the highest quality for generations.

YOU DON'T HAVE TO ACCEPT COMPROMISES!

Not all door manufacturers provide both the highest aesthetic values and the best home protection parameters.
We have created innovative composite doors from scratch to do just that – to meet even the most demanding expectations.

Advanced technology and innovative solutions allow us to produce the doors of your dreams without the slightest compromise in quality and durability! No other door has so many advantages, without the disadvantages and limitations of traditional technologies. Composite doors are resistant to adverse weather conditions, they do not absorb moisture, do not corrode and maintain the highest quality for decades.

VIKKING SPECIALIZES IN THE FULFILMENT OF EVEN THE MOST CUSTOMIZED ORDERS.

Unleash your creativity – start by changing your doors.

Choose your style, any combination of colours and door surface textures. Choose the most convenient door handles and the most beautiful stained glass, and we will handle the rest with the utmost care.

To make it easier for our customers to select products, we have divided our doors according to lines, collections, models and accessories.

Share your wishes with us and our designers will do their best to implement even the most imaginative concepts. After all, our motto is: "What is impossible for others, is standard for us"

MORE INFORMATION ON PAGE 15

Feel the power of technology that protects your safety. The most solid construction thanks to advanced composite technology and unique solutions. Components from reliable suppliers ensure the highest quality of composite doors.

NEW PRODUCTS IN 2020

New door pulls

New collections of door handles as well as other accessories can be found on pages 62-64

Coating with the GALAXY effect

The GALAXY powder coating can be used on SMOOTH surfaces in all RAL colours.

The Online Door Configurator

Configure your dream door without leaving your home!

ARCTIC ULTRA line

The new ARCTIC ULTRA line with a 90 mm door leaf joined with a 85 mm PVC six-chamber door frame has a spectacular Ud heat transfer coefficient from 0,53 W/m^{2}K. Details on page 14.

VINTAGE collection

Discover our range of doors from the Vintage collection with beautiful rustic slats. More details on page 20.

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

A NEW LOOK FOR YOUR DOOR

INSPIRATION FOR CUSTOMERS LOOKING FOR NON-STANDARD SOLUTIONS

A portal is a permanent door installation in a side layout, top layout, or any other configuration, and is an attractive architectural component. Portals, similarly to doors, are made of composite materials. That is why they are equally warm, durable and resistant to all weather conditions. A wide range of sizes and decorative solutions ensure freedom of choice in arranging the entrance to your home.

Available only in the ULTIMATE composite door line.

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

COMFORT OF USE AND FUNCTIONALITY

SMART HOME – DOORS WITH SMART CONTROL

Is it possible to replace keys with a better solution? Of course, you can use a smartphone, keyboard, fingerprint reader, card or key ring.

FUNCTIONAL FITTINGS

A remote control, automatically locking multi-point lock, invisible closing device, electronic peephole, closing sensor – these are just a few of many innovative solutions for your comfort and security.

REINFORCED WITH FIBERGLASS

Thanks to the use of fiberglass technology, composite doors are impenetrable for intruders, they do not require tedious and frequent maintenance, and their unsurpassed durability ensures security for many years.

DURABLE AND RESISTANT TO DAMAGE

25 YEARS OF WARRANTY

Composite doors are resistant to moisture and extreme weather conditions. The door leafs do not deform and are resistant to mechanical damage to a much greater extent than doors made of traditional materials. We guarantee their technical durability for decades.

EXCELLENT PARAMETERS AND PROTECTION

THE WARMEST DOORS ON THE MARKET

U_d from 0,53

Composite doors, unlike traditional metal or aluminum doors are made only of materials which protect against the loss of valuable energy. And this means measurable savings on heating the house in winter. All our composite door lines exceed the requirements of passive housing.

OUR DOORS DO NOT REQUIRE OVERHANGS

Composite doors, unlike metal and wooden doors, do not corrode, and are resistant to moisture and harmful UV radiation. As the only ones in their class, they do not require full overhang or maintaining minimum distances from heating devices inside the house.

WARM INTERCASE FRAMES IN GLAZING

All glazing in our composite doors have super warm frames between panes. The warm frame technology significantly improves the energy efficiency, soundproofing and lifetime of glass units.

SECURE

The RC2 anti-burglary class guarantees a sense of security. Composite doors are equipped with a system of multi-point locks and anti-theft bolts, which increases the level of security and protects against burglary.

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

MAKE YOUR HOME STAND OUT

ALL THE COLORS OF THE WORLD

Composite doors are varnished in all colours from the RAL palette, and can include special effects and wood-like decors. You can choose any configuration of colours you desire.

LED LIGHTING

LED lighting in glazing is an attractive and functional alternative to traditional lighting of the entrance. Vikking is one of the first brands to use integrated LED lighting in doors, including the threshold.

COLOURS WITH PEARL EFFECT

Our proprietary varnishing technology allows to apply the pearl effect on any colour from the RAL palette or wood-like decors.

☑ Optional - no extra charges.

HIDDEN HINGES

The ULTIMATE line sets new trends, and their functionality is increased by hidden hinges that allow the door leaf to open 180°.

ILLUMINATED DOOR LEAF

A gentle glow coming from under the composite wing provides soft illumination of the entrance area.

INDIVIDUAL DECORATIONS

Choose any design, content, and decorations for your house number and we will make your ideas come to life.

The CRYSTAL collection

Timeless beauty in glass

In the CRYSTAL door collection, the glazing unit is made using so-called step technology. The outer pane of the glazing, decorated with a special ceramic coating, has a larger surface area than the inner pane. This gives a unique visual effect.

The Crystal 01 model is available only in the ARCTIC PLUS line in the following dimensions:

- 1020 x 2080
- 1070 x 2130

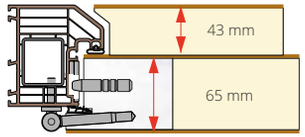
The Desing 3D application

Composite door leaf, 65 mm thick, from the ARCTIC line with an additional 43 mm thick composite overlay.

The 3D door leaf is only available in the ARTCIC line, in the inward-opening version.

External dimensions of the door from this collection:

- 970 x 2030
- 970 x 2130
- 1070 x 2030
- 1070 x 2130



Glazing in Priva-Lite technology

Electronically controlled glass with variable translucency. After supplying with low-voltage current, the liquid crystal particles in the LC foil adopt a regular system, making the glass transparent.

Protect your privacy
when you want and how you want

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

XXL DOORS

The possibility of making XXL doors in a max. dimension of 1150 mm x 2450 mm.
Do you need something bigger? Choose a door with lights or a portal.

MINI DOORS

Door shortening and narrowing without restrictions.

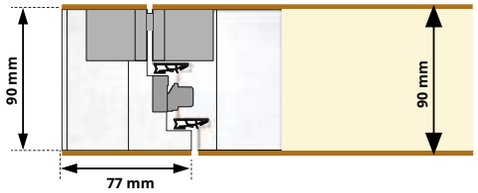
SIDE AND UPPER LIGHTING

Only in the composite door system

offer the possibility of using sidelights and transom lights in any configuration, size and shape.

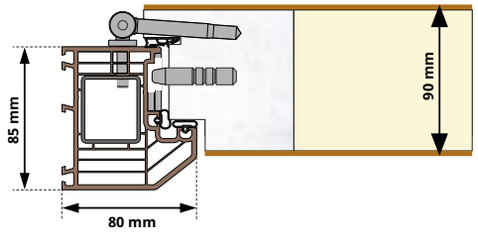
Check the lighting configuration options on page 71

U ULTIMATE



The world's first, unique combination of a door leaf with a composite frame has properties that are unavailable in traditional solutions. The whole product is made of composite materials. Both sides are flush with the frame, stable, ultra-warm, in an unlimited catalog of solutions. Only available in the ULTIMATE line.

AU ARCTIC ULTRA

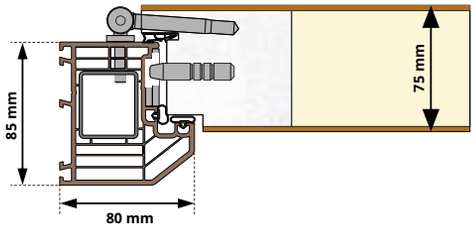


Innovative six-chamber PVC A-class door frame with Real Wood or smooth surface. PVC profiles are resistant to moisture, perfectly insulate from cold and require no maintenance. The system of extensions, connectors and clamps provides the possibility for any frame configuration.

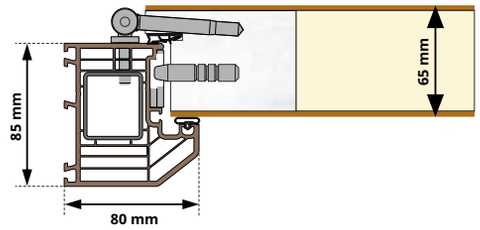
A solid multi-layer construction ensures stability of the door leaf and anti-burglary protection. The door leaf cladding is made of the highest quality fiberglass reinforced composite panels, resistant to scratches and damage.

The highest quality varnishes in any RAL colour, or in one of many wood-like decors combined with the total moisture resistance of composite doors make them much more resistant than traditional doors.

AP ARCTIC PLUS



A ARCTIC



A composite door leaf has a specially reinforced structure, preventing deformation even in the most difficult weather conditions. It is resistant to moisture and mechanical damage. Only composite door leafs consistently maintain the highest quality for decades without the need for maintenance and varnishing.

The waterproof composite frame protects the inside of the door leaf against moisture, and the CFC-free PU foam insulation with specially designed parameters for the composite door system provides excellent protection against heat loss.

Our silicone seals specially designed for composite doors guarantee the highest protection against heat loss around the entire perimeter and provide high closing comfort.

* Check the detailed conditions contained in the warranty sheet.

When choosing doors and windows, make sure to check not only the purchase price. Compare parameters, fittings, and pay special attention to a very important feature of the products: their residual value. Seemingly more expensive composite doors compared to metal or wooden doors – due to their best heat protection, several dozen years of durability and lack of required maintenance – are more cost-effective after many years of trouble-free use.

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

DISCOVER OUR COLLECTIONS

DUO COLOR collection

DUO COLOR collection – selected door models, in which the main feature is the SMOOTH surface in black or in any other RAL color. It's a base for inspiration in creating any color variants. GALAXY pearl or electro powder effect – they will add splendor to your front door. Dare to be creative, color your world starting from your door!

Pages 22-23

CLASSIC collection

In the CLASSIC collection, we present a design that combines classic forms with the lightness of FR milling. Composite entrance doors, varnished in one of the many decorations that are reminiscent of the nobility of natural wood, will emphasize the traditional, timeless style of your home. Are you looking for other decorations? There's nothing easier! Let's create your dream door together.

Pages 47-50

STONE collection

A unique form of decoration that combines the nobility of Real Wood with the rawness of stone obtained from natural deposits. Many shades of ultra-thin stone slabs in almost any configuration of shapes and color combinations are designed for those looking for original aesthetic experiences. Let's break free from traditional clichés and common decorations.

Page 51

DIPLOMAT collection

You will find the widest range of composite doors in the DIPLOMAT collection. This line is characterized by a multitude of configurations that will satisfy the most non-standard expectations, an extensive selection of doors, available in five lines, decorations and fittings – carefully selected according to your preferences.
Legendary durability ensures the comfort and safety of your loved ones.

Pages 24-46

VINTAGE collection

Discover our offer of composite doors from the VINTAGE collection – beautiful rustic slats emphasizing the nobility of natural wood.
Vertical, horizontal wood grain, or perhaps a customized arrangement? You decide on the layout, width and colors of the slats.
Free your imagination – we'll be happy to meet your expectations!

Pages 52-53

3D collection

The house is spacious, the house is 3D!
That is why we created composite doors in the 3D collection – the three-dimensional shape of the door leaf is its main decorative accent.
Painted in contrasting colors, they will additionally highlight the individual taste of your home.
Available in the ARCTIC line – in the inward opening version.

GLAZING PACKAGES - MORE SUN IN YOUR HOME

CHOOSE COMFORT AND SECURITY

Only composite doors offer the possibility to choose glazing decorations from the our wide range with any glass configuration:

- translucent glass: thermofloat
- frosted glass: decormat or sandblasted
- colored translucent glass - antisol brown or antisol graphite
- reflective translucent glass - brown reflex or graphite reflex
- opaque mirror glass - one-way mirror
- patterned glass - ornamental

For increased security and protection against burglary, we recommend combined packages using:

- P2 safety glass.
- P4 anti-burglary glass (only in simple shape packages - square, rectangle)..

BEWEL

SANDBLASTED

ONE-WAY MIRROR

DECORMAT

THERMOFLOAT

REFLEX

ANTISOL

DECORMAT

It is estimated that energy losses due to leakage in the front door may exceed 8% of the cost of heating a single-family home.
By using the innovative technology of structural bonding of three or four-pane packages with the use of warm inter-pane frames in composite doors, we significantly contribute to environmental protection, energy saving and the reduction of heating costs.

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

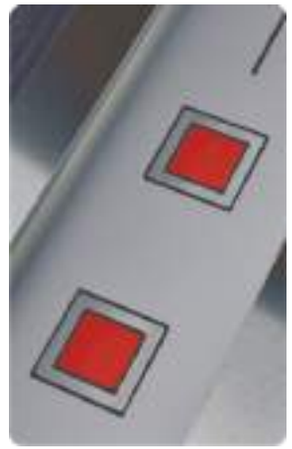
Glazing packages in composite doors have super warm glazing frames. This significantly improves their energy efficiency and acoustic comfort. We make glazing packages and stained glass decorations in our own studio, nothing is impossible for us.

Group of decorations	Types of decorations
Group 0	Glazing packages - not decorated
Group I	Decorated glazing and stained glass packages: - engraved - resin decoration - one-way mirror
Group II	Stained glass packages decorated with glued glass elements and elements of inox decorations: - with a bevel and/or inox decoration - with fusing and/or inox decoration - engraved or resin with a bevel and/or inox decoration - engraved or resin with fusing and/or inox decoration
Group III	Stained glass packages for custom orders: - Priva-Lite (glass with variable transparency) - Step Glass (ceramic lacquered glass) - with bevel glass from the Paulo collection - with bevel glass from the Paulina collection - custom orders

Fusing - colors embedded in glass

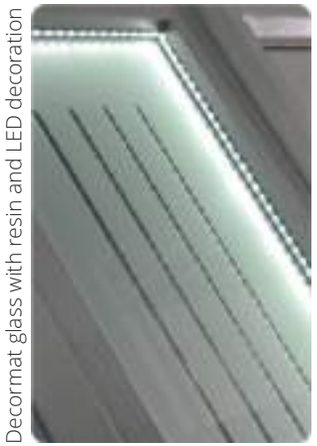
Swarovski - jewelry for your door

Bevel glass – the beauty of cut glass



Resin - multitude of colors

LED lighting - a bright accent for your home



Decormat glass with resin and LED decoration

LED lighting in a package with a one-way mirror

The most beautiful collections of stained glass decorations only in VIKKING composite doors.

REMOTE CONTROLLED DOORS

FORGET ABOUT USING KEYS

CHOOSE COMFORT AND SECURITY

Your composite door can be equipped with an intelligent control system and integrated with your Smart Home installation. Don't worry about carrying keys around any more and open your doors in any way you like. You can grant access to any family member. You have full control. Define your priorities, we will take care of the rest.

BIOKEY FINGERPRINT READER

Slide your registered finger on the surface of the reader and your door will automatically open. When you cross the threshold, the door closer will immediately close the leaf and the automatic lock will lock it again.

GLASS KEYBOARD WITH BLUETOOTH

A solution that allows the door to be opened using a keypad or a device with Bluetooth (e.g. a smartphone or tablet). Six devices and 18 numeric codes can be entered into the system.

RFID – CARD READER

Thanks to this system, you can open the door using a credit card, company access card, ATM card or a key ring.

CYLINDER LOCK CONTROLLED WITH A SMARTPHONE

Your keys can be replaced by your telephone with the free WILKA easyApp. The mechatronic cylinder lock communicates with your smartphone via Bluetooth. The cylinder lock is powered by a cr2-v3 battery.

The set contains:

- a programming card
- a user key ring
- a key to replace the battery

Advantages of the cylinder lock:

- access to rooms without additional mechanical keys
- for smartphones with Android or iOS and Bluetooth
- secure and convenient management of access authorization from a smartphone and Mifare transponders,
- granting individual access rights for each system user,
- the system can be expanded at any time,
- maximum number of system users – 250,
- reading up to 1000 historical events with the date and time on the smartphone screen,
- engaging the cylinder clutch for a single opening or permanently (office mode).

EASY TO INSTALL **SECURITY** **FLEXIBILITY**

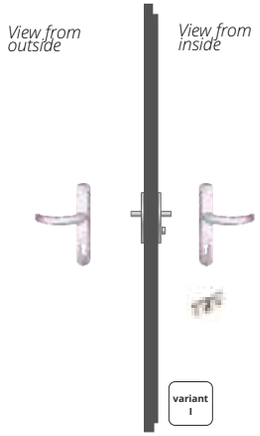
WAYS OF OPENING COMPOSITE DOORS

Double-sided handle

Door opened on both sides with a handle.



- double-sided handle
- cylinder

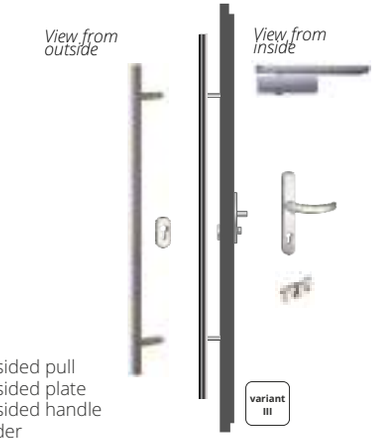
Handle-pull

From the inside: open with a door handle
From the outside: open with a key and pull

- one-sided pull
- one-sided plate
- one-sided handle
- cylinder

Handle-pull with fixed strike plate

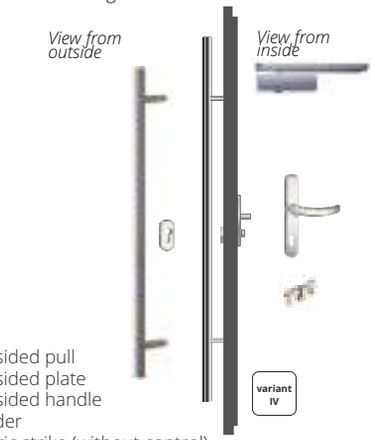
From the inside: open with a door handle
From the outside: during the day: use the door pull; at night: open using the key and use the door pull. We recommend using a door closer.



- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- fixed strike plate (day and night)
- door closer

Handle-pull with electric strike

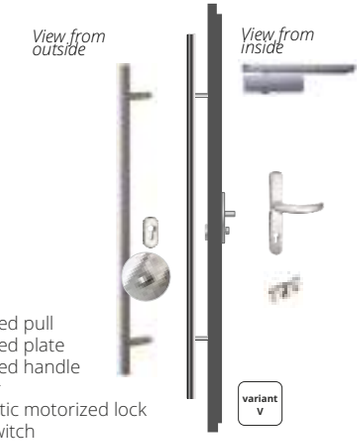
From the inside: open with a door handle
From the outside: during the day: use the door pull; at night: open using the key and use the door pull; optionally: control using intercom. We recommend using a door closer.



- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- electric strike (without control)
- door closer

Handle-pull with microswitch

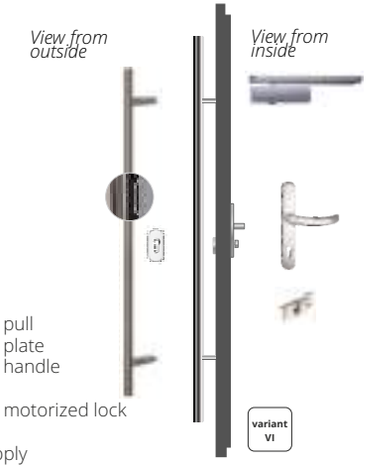
From the inside: open with a door handle
From the outside: press the micro switch in the pull and open the door. We recommend using a door closer.



- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- automatic motorized lock
- microswitch
- power supply
- door closer

Handle-pull with sensor

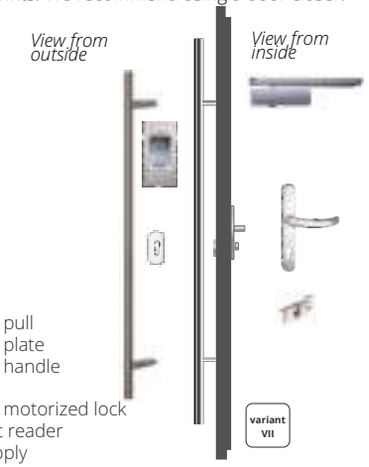
From the inside: open with a door handle
From the outside: press the sensor in the pull and open the door. We recommend using a door closer.



- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- automatic motorized lock
- sensor
- power supply
- door closer

Handle-pull with a fingerprint reader

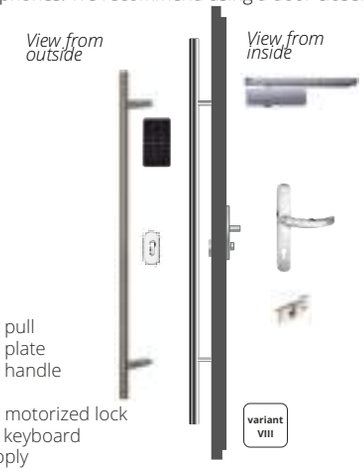
From the inside: open with a door handle
From the outside: scan your finger on the reader and open the door. The system remembers max. 150 fingerprints. We recommend using a door closer.



- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- automatic motorized lock
- fingerprint reader
- power supply
- door closer

Handle-pull with a Bluetooth keyboard

From the inside: open with a door handle
From the outside: enter the code on the keyboard and open the door. The system remembers max. 18 codes and 6 smartphones. We recommend using a door closer.



- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- automatic motorized lock
- Bluetooth keyboard
- power supply
- door closer

Handle-pull RFID (key fob control)

From the inside: open with a door handle
From the outside: scan the code with the key ring and open the door. The system remembers max. 150 cards or key rings. We recommend using a door closer.

- one-sided pull
- one-sided plate
- one-sided handle
- cylinder
- automatic motorized lock
- RFID
- power supply
- door closer

PERFECTLY MATCHED TO YOUR HOUSE

The possibility of adding sidelights and transom lights in any configurations, sizes and shapes.

Sidelights and transom lights are a great idea for more daylight in the interior. They are perfect for full doors.

The sidelights can be filled with:
- glazing with any decorations
- composite panel

In the ULTIMATE line, thanks to the combination with a composite door frame, the sidelight system is constructed without visible connecting profiles.

In the remaining lines, the sidelight construction is based on a system of static connectors ensuring stability of the structure.

DOOR MAINTENANCE

LIMITED TO MINIMUM

Door maintenance products:
- multifunctional oils and greases
- agents for the maintenance of fittings, metal elements and stainless steel
- seal maintenance products

Winkhaus oil for lubricating fittings
Price*:
2,00 € - 10 ml

Spray for cleaning and maintaining inox
Price*:
12,00 € - 600 ml

Inox maintenance spray
Price*:
5,00 € - 400 ml

Cleaning agent for inox
Price*:
3,20 €- 30 ml

*Not subject to discounts.

In addition, we offer:
1. Components and systems for warm installation of composite doors and Real Wood windows
2. Renovation silicone seal for PVC doors and windows,
3. Retouch, wax and varnishing touch-up systems,
4. Components and spare parts for composite doors and PVC windows,
5. Stained glass products and flat glass products – used in the following industries: construction, interior finishing, religious, and advertising.

RECOMMENDED!

ASYMMETRICAL SHAPE

Renovation seal for doors and windows
Price*: 0,76 € /mb

☑ Did you know?
Silicone seals guarantee the highest protection against heat loss for many years and provide above-standard comfort of use when closing the door.

Vikking is the sole producer of energy-saving composite wood doors and Real Wood windows. Our unique solutions are the subject of many applications for international patent protection.
One style, the highest quality and personalized accessories – in one place, from a reliable supplier.

WINDOWS REAL WOOD

Please contact us for an accurate pricing: info@entrydoors-toronto.com; Ph.: (416) 800-7737

ENERGY-SAVING VIKKING WINDOWS

INNOVATIVE DESIGN

INNOVATIVE IDEA

Wooden products are susceptible to many threats resulting from the destructive effect of moisture on the hygroscopic structure of wood. That is why we decorate the surface of PVC profiles to provide them with the aesthetics of precious wood and eliminate the effects and inconveniences resulting from the use of wood.

INNOVATIVE TECHNOLOGY

PVC profiles decorated with Real Wood technology, unlike wood, do not require maintenance against weather conditions. Possible repairs of the structure and varnish coatings are also possible in buildings where windows with the Real Wood surface are installed.

REAL WOOD
PATENTED
INDUSTRIAL DESIGN

PERFECT TECHNOLOGY

AESTHETICS AND QUALITY

The width of the weld – the place where the window profiles are connected – has a significant impact on the aesthetics of the window. We manufacture Real Wood windows in V-PERFECT technology on lines equipped with state-of-the-art numerically controlled robots to make profile connections stronger, more precise and provide more tightness than traditional welds.

V-PERFECT TECHNOLOGY

UNIQUE PVC WINDOWS WITH REAL WOOD PROFILES

The unique decoration system created by the VIKKING team of engineers is subject to international patent protection.

The surface decoration of PVC profiles in RW technology eliminates the need for veneering profiles and ensures everlasting durability of the obtained structure.

Real Wood windows, unlike wooden windows, do not require expensive surface maintenance.

The surface of the Real Wood window profiles is very similar to that of noble wood, but without the disadvantages that wood has.

Real Wood decoration and varnishing can be made in any configuration.

Unlike veneered windows, Real Wood windows always have all visible niches varnished in the same color as the outer color of the windows.

PROPRIETARY SOLUTION

DIFFERENT SHAPES AVAILABLE

FILLING OF THE FITTING GROOVE

VARNISHED RECESSES

STRUCTURAL BONDING OF GLAZING

Our proprietary solution of combining traditional glazing with the structural bonding of glazing packages prevents the door leafs from sagging, improves anti-burglary parameters, and increases safety and comfort of use. It also allows to optimize the steel reinforcements of window profiles, which greatly affects protection against the loss of valuable energy. This patented innovative solution is a continuation of our proprietary method of structural bonding of glazing in composite doors.

REVOLUTIONARY AIRING

ENERGY-EFFICIENT AIRING WITHOUT DRAFTS

During airing, the window meets the requirements of the ENV 1627-1630 standard up to class RC2. Therefore, it has the parameters of a closed anti-burglary window.

door leaf sliding function on 6 mm

SMART SLIDE

Sliding terrace doors

SMART-SLIDE sliding doors are a new generation in sliding terrace doors, which are characterized above all by excellent technical properties and comfort of use. Smart-slide sliding doors give the opportunity to create a glass structure with overall dimensions of 5.85 x 2.5 m. Locking around the entire perimeter of the leaf provides high downforce, and when opened, the leaf moves lightly.
An innovative closing mechanism allows for simple and intuitive operation.

LIGHTEN UP YOUR LIVING ROOM

SMART SLIDE doors provide not only potential profits and satisfaction with comfort of use, but are also known for their interesting minimalist and slightly Scandinavian design. The non-opening part of permanent glazing implemented in extremely narrow profiles allows for maximizing glazing surfaces and reducing the surface of the frames, which is consistent with customer expectations and trends in the design of modern glazing.

HST

Lift and slide terrace doors

MORE LIGHT

The perfect solution for a comfortable combination of the interior with the terrace and for a panoramic view – thanks to the large glass area in the HST lift-slide door.

AMAZING LIGHTNESS

Special mechanisms allow to move huge door leafs with minimal force. Turning the handle downwards from the closed position raises the leaf by a few millimeters, releases the downforce of the seals and allows to easily move the leafs.

A house without barriers? Of course!
A low threshold in terrace doors.

PSK

Tilt and slide terrace doors

The maximum dimensions of PSK door leafs reach: 1600x2100mm or 1400x2300mm. The advantages of this solution are moderate prices and high tightness. The main benefit of such a solution is the creation of a large glazed surface while maintaining the functionality of the rooms.

aluplast Always precise WINKHAUS GLASSOLUTIONS SAINT-GOBAIN

This price list comes into force on 05/04/2020 and cancels previous offers.

All information contained in this publication has been provided for promotional purposes only and cannot be the subject of a binding commercial offer. The offer is valid from 04/05/2020. On this day all previous offers expire. The individual production process, differences in wood grain, colors and structure of the door surface, as well as the manual creation of stained glass decorations make up the unique character of VIKKING composite doors, any claims in this regard cannot constitute grounds for complaint. Due to printing conditions, the colors and patterns presented may slightly differ from the real ones and cannot be considered binding. The manufacturer reserves the right to technical improvements and product changes. We manufacture and equip all products only based on individual customer orders. Before installing the door, read the instructions for installation, use and maintenance, and the warranty conditions of the door. Failure to comply with the rules contained therein may void the warranty. We make every effort to ensure that our publications contain full and reliable knowledge about the offer, but we are not responsible for any inaccuracies. This publication is fully protected by copyright. Copying, including partial copying, always requires the consent of the manufacturer. We manufacture composite doors and Real Wood windows based on our own proprietary, patented technological solutions. Unlawful infringement of intellectual property will be the basis for claims for damages.

We have created unique solutions protected by international patents, including a composite entrance door system and the Real Wood decoration method. Enjoy the noble beauty of natural wood without harming the environment.

Let's make sure that our forest are protected and healthy, and not a resource base for products that are not resistant to weather conditions.
